Summary

- Security Research Engineer at Cisco Systems
- M.S in Computer Science from UNC Chapel Hill
- B.S. in Computer Science and Mathematics from the University of Tennessee
- Experienced with C, Python, Linux, Git, Rust

Education

- **University of North Carolina at Chapel Hill, Fall 2019 - Spring 2021**
  - Pursuing Masters in Computer Science
  - Advisor: Mike Reiter
  - Courses included: Cryptography, Networking
- **University of Tennessee, Fall 2015 - Spring 2019**
  - Graduation: Spring 2019
  - Majors: Computer Science, Mathematics
  - GPA: 3.98/4.0
  - Dean's List- Fall 2015 - Spring 2019
  - Courses included: Programming Languages, Data Structures and Algorithms, Operating Systems/Systems Programming, Software Engineering, Cryptography, Compilers, Parallel Programming with MPI, Network Security

Experience

- Security Research Engineer for the ASIG group at Cisco Systems
  - 2021 - Mar 2026: Security researcher focused on manual bug discover and exploitation across a variety of Cisco Products
  - Mar 2026 - Present: Security Researcher focused on automated bug discovery using Mythos class AI models
- Cisco Systems Advanced Security Initiatives Group Summer Internship (2019)
- TennLab Neuromorphic Computing Research (2018)
- Internship in Application Development at Pilot Flying J (2017)
- NSF REU for Cyber-Security in Smart Cities (2016)
- **Skills and Certifications:**
  - GIAC Cloud Penetration Tester (GCPN)
  - Rust, C, Python
  - Bash/Posix Shell Scripting, Git

- **Significant Projects**

- Copper Programming Language
- Polling Application for classroom settings
- X86_64 Bootloader
- X86_64 Operating System
- B+ Tree / FAT Implementation on Simulated Disk

Publications

- Mookiah, Lenin, Chris Dean, and William Eberle. "Graph-Based Anomaly Detection on Smart Grid Data" *Florida Artificial Intelligence Research Society Conference (2017)*
- J. S. Plank and C. Zheng and C. D. Schuman and C. Dean "Spiking Neuromorphic Networks for Binary Tasks" *"International Conference on Neuromorphic Computing Systems (ICONS)" (2021)*

CVES

- CVE-2024-20284 - NXOS Python Sandbox Breakout Privilege Escalation
- CVE-2024-20285 - NXOS Python Sandbox Breakout Privilege Escalation
- CVE-2024-20286 - NXOS Python Sandbox Breakout Privilege Escalation
